YESHRUTHA S

AI/ML Engineer | Backend Developer | DevOps Enthusiast

yeshruthagowda@gmail.com | +91 8660206161 | Bengaluru, Karnataka | LinkedIn | Github | Portfolio

SUMMARY

B.E Computer Science Engineering (AIML) student with demonstrated proficiency in AI/ML development, full-stack applications, cybersecurity analysis, and DevOps solutions. Hands-on expertise in Python, JavaScript, SQL, and cloud technologies. Seeking internship opportunities to apply technical skills to enterprise-level projects while contributing to data-driven solutions.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C, SQL, HTML, CSS

AI/ML & Data Science: Pandas, Numpy, Scikit-learn, OpenCV, Deep Learning, TensorFlow, Feature Engineering, Model Evaluation (Accuracy, Precision, Recall, F1-Score)

Web & Backend Development: React, Node.js, REST APIs, Express.js, Zustand, Tailwind CSS, Full-Stack Development

DevOps & Cloud Infrastructure: Docker, Kubernetes, Jenkins, CI/CD Pipelines, Prometheus, Grafana, SonarQube, Containerization

Cybersecurity & Data Analysis: Identity and Access Management (IAM), Security Analysis, Risk Assessment, Tableau, Power BI, Data Analytics

Databases & Tools: MySQL, MongoDB, Git, GitHub, SQL Query Optimization

PROFESSIONAL PROJECTS

G-Care: AI Healthcare Assistant

Developed comprehensive elder-care monitoring platform with role-based portals for caregivers, guardians, and doctors. Implemented real-time vitals tracking, medication reminders, emergency SOS alerts, and multilingual voice notifications. Automated care report generation reducing documentation time by 70%.

- Tech Stack: React, Zustand, Recharts, Tailwind CSS, Node.js, REST APIs

AttendX: Smart Face Recognition Attendance System

Built real-time face recognition system using OpenCV and deep learning achieving 95% recognition accuracy. Automated attendance logging for 50+ users, reducing manual effort by 80%. Integrated seamless database synchronization for institutional deployment.

- Tech Stack: Python, OpenCV, Deep Learning, MySQL Database, REST APIs

Laptop_Buddy: Predictive Maintenance System

Developed predictive laptop health monitoring assistant using Scikit-learn analyzing real-time system telemetry to detect failure patterns with 89% accuracy. Implemented automated alerts for hardware issues, battery degradation, and preventive maintenance recommendations via offline PyQt5 desktop interface.

- Tech Stack: Python, Scikit-learn, PyQt5, System APIs, Predictive Modeling

RapidOps: Automated DevOps Pipeline

Designed and deployed containerized Java and Python applications with fully automated CI/CD pipelines. Implemented infrastructure monitoring and observability with Prometheus, Grafana, and SonarQube for code quality assurance. Achieved 100% deployment automation reducing manual intervention by 95%.

- Tech Stack: Docker, Kubernetes, Jenkins, Prometheus, Grafana, SonarQube, CI/CD Automation

Secure Search on Encrypted Data

Built a privacy-preserving searchable encryption system enabling secure multi-keyword search over encrypted documents. Implemented AES encryption, RSA-based key protection, SHA-256 trapdoor search, and Role-Based Access Control (RBAC) to ensure data confidentiality and secure access.

- Tech Stack: Python, Flask, AES, RSA, SHA-256, HTML, CSS, JavaScript

CERTIFICATIONS & JOB SIMULATIONS

- Cybersecurity Analyst Job Simulation - Forage (2026)
- Data Analytics Job Simulation - Forage (2026)
- GenAI Powered Data Analytics Job Simulation - Forage (2026)
- Project Manager Job Simulation - Forage (2026)
- Software Engineering Job Simulation - Forage (2026)
- Data Science Specialization - Ethnotech Academy (2023-2026)
- Web Development Fundamentals - Infosys Springboard (2024)

EDUCATION

Bachelor of Engineering in Computer Science Engineering (AI/ML)

- East West Institute of Technology, Bengaluru | 3rd Year | CGPA: 8.13

Pre-University College (PUC)

- KLE S Nijalingappa PU College, Bengaluru | Score: 82%

Secondary School Leaving Certificate (SSLC)

- Mount Senoria School, Bengaluru | Score: 87%
