

YESHRUTHA S

AI/ML Engineer

yeshruthagowda@gmail.com | +91 8660206161 | www.linkedin.com/in/yeshrutha-s-181463298 | <https://github.com/yeshrutha>

SUMMARY

Motivated B.E (CSE-AIML) student with strong problem-solving skills and hands-on experience in Python, C, Java, web development (HTML, CSS), and databases (SQL, MongoDB). Skilled in data visualization using Tableau and Power BI. Seeking an opportunity to contribute to real-world AI/ML projects, build efficient solutions, and gain meaningful industry experience.

TECHNICAL SKILLS

Programming & Web: Python, C, Java, HTML, CSS

AI / ML: NumPy, Pandas, Scikit-learn, Data Analysis, Exploratory Data Science

Visualization: Tableau, Power BI

Databases & Tools: SQL (MySQL), MongoDB, Git, GitHub

EDUCATION

Bachelor of Computer Science Engineering (AIML)

East West Institute of Technology, Bengaluru

- Currently in 3rd Year | CGPA: 8.0

Pre-University College (PUC)

KLE S Nijalingappa PU College, Bengaluru

- Score: 82%

SSLC (10th Standard)

Mount Senoria School, Bengaluru

- Score: 87%

PROJECTS

G-care - AI Healthcare Assistant

- Built an elder-care monitoring platform with caregiver, guardian, and doctor portals. The app tracks live vitals, medications, alarms, SOS, multilingual voice reminders, smartwatch simulation, and care reports using React, Zustand, Recharts, Tailwind CSS, and a Node.js API.

AttendX - Smart Attendance System

- Developed a real-time face recognition system using OpenCV and deep learning, achieving ~95% recognition accuracy, and automated attendance logging for 50+ users, reducing manual effort by 80%.

Laptop_buddy - Predictive Maintenance System

- Developed a predictive laptop health assistant that analyzes real-time system telemetry to detect risk patterns, warn users about overheating or battery degradation, and recommend preventive actions through an offline PyQt5 desktop interface.

RapidOps - Automated DevOps Pipeline

- Built and maintained RapidOps - a full-stack DevOps project featuring containerized Java and Python applications, automated CI/CD pipelines via Jenkinsfile and Docker, and Kubernetes deployments with k8s and manifests. Implemented observability using Prometheus and Grafana, code quality with SonarQube, and produced deployment and monitoring documentation.

ACHIEVEMENTS & CERTIFICATIONS

- Ethnotech Academy - HTML & CSS, Bootstrap, Advanced Java, Data Science, Computer Networks, DevOps
- Infosys Springboard - HTML, CSS, JavaScript, Decision Trees using Python
- Hack-A-League 4.0 - Participant | ADVAYA 2.0 - Participant | CODE CLASH - Participant
