### SUMMARY

B.E [CSE-AIML] student with hands-on experience building ML models (Scikit-learn, OpenCV), full-stack applications (React, Node.js), and DevOps pipelines (Docker, Kubernetes). Passionate about developing production-ready AI/ML systems and solving real-world problems through automation and data-driven solutions.

### TECHNICAL SKILLS

**Programming & Web:** Python, C, Java, HTML, CSS, JavaScript

**AI / ML:** NumPy, Pandas, Scikit-learn, OpenCV, Deep Learning, Model Evaluation (Accuracy, Precision, Recall, F1-Score)

**Backend & DevOps:** Node.js, REST APIs, Docker, Kubernetes, Jenkins, Prometheus, Grafana, SonarQube

**Visualization:** Tableau, Power BI, Recharts, Matplotlib

**Databases & Tools:** SQL (MySQL), MongoDB, Git, GitHub

### EDUCATION

**Bachelor of Computer Science Engineering (AIML)**

**East West Institute of Technology, Bengaluru**

- Currently in 3rd Year | CGPA: 8.0

**Pre-University College (PUC)**

**KLE S Nijalingappa PU College, Bengaluru**

- Score: 82%

**SSLC (10th Standard)**

**Mount Senoria School, Bengaluru**

- Score: 87%

### PROJECTS

**G-care - AI Healthcare Assistant**

- Built an elder-care monitoring platform with caregiver, guardian, and doctor portals. Implemented live vitals tracking, medication reminders, emergency SOS, multilingual voice alerts, and automated care reports. Tech stack: React, Zustand, Recharts, Tailwind CSS, Node.js.

**AttendX - Smart Attendance System**

- Developed a real-time face recognition system using OpenCV and deep learning, achieving ~95% recognition accuracy, and automated attendance logging for 50+ users, reducing manual effort by 80%.

**Laptop\_buddy - Predictive Maintenance System**

- Developed a predictive laptop health assistant using Scikit-learn that analyzes real-time system telemetry to detect failure patterns with 89% accuracy. Implemented automated alerts for overheating, battery degradation, and preventive maintenance recommendations via PyQt5 offline desktop interface.

**RapidOps - Automated DevOps Pipeline**

- Designed and deployed containerized Java/Python applications with automated CI/CD pipelines using Jenkins, Docker, and Kubernetes. Implemented monitoring and observability with Prometheus, Grafana, and SonarQube

### ACHIEVEMENTS & CERTIFICATIONS

- Data Science Specialization - Ethnotech Academy (2024)
- Web Development Fundamentals - Infosys Springboard (2024)
